

Hazardous And Non-Hazardous Waste Management

We provide environmentally friendly and cost-effective waste management services that are aimed at protecting the environment. Our waste management services include:

Hazardous and Non-Hazardous Waste Collection

We offer a dynamic service of collecting liquid and solid hazardous and non-hazardous waste from our customers' sites. These wastes include:

- Used oil
- Used grease
- Sand contaminated with oil and grease
- Used air filters
- Used oil filters
- Oil contaminated hoses

Transportation of Hazardous and Non-Hazardous Waste

We provide safe, efficient, and affordable hazardous waste transportation services from our customers' sites to our site.

Recovery of Waste

Used liquid oil collected and transported from our customers' sites is processed by removing any solid waste contents. The pure used oil is sent to a registered used liquid oil recycling and treatment facility where it is further processed and sent to final users that converts it into energy in the form of usable heat or fuel.

Safe Disposal of Hazardous and Non-hazardous Waste

Any waste that is unsuitable for recovery and recycling is transported to registered landfill sites where it is safely disposed.

Benefits of our hazardous and non-hazardous waste management services:

- Its environmentally friendly.
- Cost effective and affordable.
- Safe hazardous waste disposal documentation is provided to our customers.
