# SRS GLOBAL TRADING

How our consultants  
can help with your Industrial Tyre Maintenance

Our on-site tyre management and maintenance teams in collaboration with leading-edge technical and training support from our regional offices provide round-the-clock operational service for mine operators, construction companies and civil engineering companies. Expand your tyre lifespan with added benefits that we offer including a comprehensive driver training programme that is offered in-house as part of SRS contribution.

Trained and experienced teams of tyre fitters, workshop supervisors, engineers and managers take responsibility for every aspect of the site tyre operation.

#### Areas of specialty:

- Tyre stripping and fitting
- Tyre and rim inspections
- Wheel swapping or rotating
- Tyre surveys and reporting
- Tyre selection
- Regular wheel pressure monitoring and control
- Wheel condition monitoring, analysis and life cycle performance reporting
- Tyre repair and warranty management
- Mine and haul road design or maintenance guidelines
- Routine workshop functions of tyre changing.

Our round-the-clock tyre management and maintenance teams ensures that our customers enjoy the following benefits:

- Reduced equipment downtime
- Extended tyre lifespan
- Tyre life improvement
- Better and improved fuel efficiency
- On time product delivery and service provision
